EDUCATION

B.Tech. - Computer Science and Engineering (Cyber Security and Digital Forensics) October 2022 – May 2026
VIT Bhopal University CGPA: 8.24/10.00

EXPERIENCE

Launchit.today

March 2024 – Jan 2026

Full Stack & DevOps Engineer

- Developed and shipped production features across **Next.js** frontend and **Node.js/Express** backend, contributing to core user-facing workflows end to end.
- Designed **RESTful APIs** with JWT-based authentication, input validation, and role-based access control for secure data handling.
- Containerized services using **Docker** and managed cloud deployments on **Linux-based infrastructure**, ensuring consistent environments across dev and production.
- Collaborated in an agile team — triaged production bugs, reviewed PRs, and maintained **CI/CD pipelines** for automated delivery.

SKILLS

Languages: TypeScript, JavaScript, C++, SQL

Frontend: React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, WebSockets

Databases: PostgreSQL, Prisma, MongoDB

DevOps: Docker, Kubernetes, Linux, CI/CD , AWS (EC2 , ASG , ECR , ECS)

Tools: Git, GitHub, Turborepo

PROJECTS

DRAWSPACE

Feb 2026 – Present

Real-Time Collaborative Diagramming Platform

- Built a **real-time collaborative whiteboard** using a **Turborepo monorepo** with **Next.js**, **TypeScript**, **Prisma**, **PostgreSQL**, and Tailwind CSS.
- Implemented **WebSocket-based real-time sync** with room-based collaboration, canvas persistence, and secure **REST + WebSocket APIs** using JWT auth, RBAC, and **Zod** validation.
- Built **CI/CD pipelines (GitHub Actions)**, containerized services with **Docker**, and deployed frontend on **Vercel** and backend on **Railway**.
- Designed a **Kubernetes-ready architecture** and deployed backend on a local **Kind cluster** using **kubectl**, configuring **Deployments**, **Services**, **Ingress**, **ConfigMaps**, **Secrets**, and **Namespaces**.

THREADLY

Jan 2026 – Mar 2026

Full-Stack Social Media Platform

- Built a **full-stack social media app** using **Next.js**, **TypeScript**, **PostgreSQL**, and **Prisma ORM** with posts, comments, likes, and follows.
- Implemented **authentication and authorization** using **Clerk** with protected routes and a scalable relational database schema.
- Built a responsive UI using **Tailwind CSS** and **shadcn/ui** with reusable React components and **Docker** containerization for deployment.
- Deployed app on a local **Kubernetes (Kind)** cluster using **kubectl**, configuring **Pods**, **Deployments**, **Services**, **Ingress**, **ConfigMaps**, **Secrets**, and **Namespaces**.

TEACHIO

Oct 2025 – Nov 2025

Full-Stack Course Selling Platform

- Architected a **scalable MERN stack application** with a modular **TypeScript** backend, 7-8 normalized **MongoDB** schemas, and RESTful APIs.
- Implemented **secure authentication**, **role-based authorization**, and end-to-end CRUD workflows with role-based dashboards for course management.
- Built a **component-driven React frontend** (20+ reusable components) with **Tailwind CSS** and **shadcn/ui**.

ACHIEVEMENTS

Solved **250+ DSA problems** on LeetCode, GeeksforGeeks, and CodeStudio across full-stack development, backend architecture, and frontend design.

Built and deployed **3+ production-grade full-stack applications** integrating real-time collaboration, authentication, cloud deployment, and CI/CD pipelines using modern web technologies.
